

Job Description – Data Analyst

We are seeking a **Data Analyst** to join our growing analytics team. The ideal candidate should:

- Have strong proficiency in **SQL** for querying large datasets.
- Be skilled in **Python** for data cleaning, wrangling, and statistical modeling.
- Be experienced with **Tableau or Power BI** for dashboard creation and reporting.
- Possess knowledge of **A/B testing, regression, and hypothesis testing**.
- Hold at least **2 years of experience** in data analytics.
- Bachelor's degree in **Computer Science, Statistics, or Mathematics**.

Responsibilities:

- Build interactive dashboards for business stakeholders.
- Perform data-driven analysis to identify trends.
- Collaborate with data engineering to optimize pipelines.
- Communicate insights to business leaders.
